

Introduction

Ubash (AMU Token) is a new digital asset created to establish a transparent, credible, and community-driven cryptocurrency project. The initiative is supported by an official website, a dedicated team, and verified communication channels. The community has already begun through Telegram (bot and channel) and Twitter, serving as the foundation for growth and engagement.

Problem Statement

Many new cryptocurrency projects fail due to the absence of a clear roadmap, transparent team information, and official communication channels. Investors and communities seek projects that demonstrate credibility, organization, and long-term vision.

Solution

Ubash addresses these challenges by providing

- .An official website with a clear presentation of the project
- .A transparent team with defined roles and responsibilities
- .Verified communication channels on Telegram and Twitter
- .A roadmap designed to ensure sustainable growth and eventual listing on centralized exchanges

Tokenomics

.Ubash (AMU Token) has a total supply of 1,000,000,000 AMU, defined in the smart contract. At this stage, the exact distribution percentages of the token supply have not yet been determined.

The allocation will be designed to ensure fairness, transparency, and long-term sustainability for the community, team, marketing, and future development.

.Final distribution details will be announced later and officially published once confirmed.

Roadmap

- Phase 1: Build the community through Telegram bot, Telegram channel, and Twitter - presence
- Phase 2: Launch the token through PinkSale -
- Phase 3: Release the official website with team page and whitepaper -
- Phase 4: Organize an airdrop campaign to attract new users -
- Phase 5: Expand partnerships and strengthen community engagement -

.Phase 6: Prepare for listing on centralized exchanges with a focus on trusted platforms -

Team

The Ubash project is led by a dedicated team with clear responsibilities, including project leadership, blockchain development, marketing, and community management. Team
.transparency ensures credibility and accountability

Community and Communication

Ubash has established official communication channels through Telegram and Twitter. These platforms serve as the primary hubs for announcements, updates, and community
.interaction

Conclusion

Ubash (AMU Token) is built on the principles of fairness, transparency, and sustainability. With a strong foundation in community building, a clear roadmap, and a commitment to long-term growth, Ubash aims to become a trusted digital asset in the cryptocurrency
.ecosystem
